**PRIMULA chinensis** (Chinese Primrose). All our Chinensis and Stellata Primroses are grown for us by an English specialist who grows nothing but Primulas, and our strains of these were among the best exhibited for the last two seasons. For excellence in every point they cannot be equaled.

## WINTER-FLOWERING SPENCER VARIETIES FOR GREENHOUSE

All white-seeded varieties will germinate better if sown in small pots of sand, being less liable to decay and can readily be transplanted to permanent place. One ounce of seed is plenty for a 25-foot row. Temperature about 45 degrees at night and 10 degrees higher during the day. Watch out for insects and feed when in full bloom. For blooming at Christmas sow before end of September. For January, February and March, sow about the middle of October. For Easter sow first of December.

# RUBBER HOSE

FOR

## Greenhouse and Garden

---

THE BEST IS THE CHEAPEST AND  
OUR DREADNAUGHT BRAND  
IS THE BEST

This is a braided hose made of the best materials and will withstand any general service pressure. It is not liable to kink and will endure the usual treatment of garden hose for a much longer time than garden hose generally sold.

We offer this in 25- and 50-foot lengths; also in reels of 500 feet. *Coupled in any lengths desired, with no extra charge for couplings on lengths of 25 feet or over.*

$\frac{1}{2}$  inch, 16 cents per foot

$\frac{3}{4}$  inch, 18 cents per foot
